EDUCATION

Renmin University of China, M.S. in Statistics

2025 – Expected 2028

- School of Statistics. Advisor: Prof. Feng Zhou.
- Current interests include temporal point processes, statistical machine learning, and deep generative models.

Shandong University, B.S. in Financial Mathematics (Honors)

2017 – 2021

- Visiting student at University of California, Berkeley in Spring 2020; awarded Outstanding Exchange Student Scholarship.
- Awarded Honorary Bachelor's Degree of Shandong University; ranked 1st out of 28 students.
- Second Prize in China Undergraduate Mathematical Contest Final, Jilin Division, 2020.

CURRENT RESEARCH

Structure-Aware Generative Modeling for Temporal Point Processes

2025 – Present

- Study whether edit-based generative models for temporal point processes can preserve important second-order structures, such as autocovariance and spectral properties.
- Aim to connect modern generative modeling with classical statistical understanding of point processes.

PREVIOUS RESEARCH EXPERIENCE

Data and Research Assistant, UC San Diego / The University of Hong Kong

Spring – Fall 2020

- Processed historical Chinese textual records and transformed event descriptions into structured variables using Python and Stata; Processed trade and employment datasets, including customs data crawling and industry-level data cleaning.
- Contributed to data construction, visualization, and empirical research support for projects in political economy and international trade.

TEACHING EXPERIENCE

Teaching Assistant, Renmin University of China / Shandong University

2020, 2025

- Served as teaching assistant for a Python programming course in Fall 2020 and a graduate English course in Spring 2025.
- Assisted with course organization, student communication, and learning support.

Mathematics and Statistics Tutor / Instructor, Private Education Institutions

2022 – 2024

- Provided tutoring for middle-school, undergraduate, and graduate-level mathematics and statistics courses, including AP mathematics, stochastic analysis, real analysis, complex analysis, and econometrics.
- Designed teaching materials and provided long-term one-on-one or small-class instruction.

SKILLS

- **Programming:** Python, PyTorch, NumPy, Pandas, R, Stata, MATLAB.
- **Languages:** Mandarin Chinese (native), English (working proficiency; GRE 329, CET-6 600).

ACTIVITIES

- Student organization experience in career development and external relations.
- Campus athletics awards in long-distance running and freestyle rope skipping.
